Question	Answer	Marks	Partial Marks	Guidance
8	70	**4**	**B3** for $x = 11$ OR **M1** for $132 - 2x + 15 + 5x = 180$ oe **M1** for collecting x terms on one side and number terms on the other for *their* equation. **M1** for $15 + 5 \times$ *their* x oe where $-3 <$ *their* $x < 15$ or for $132 - 2 \times$ *their* x oe where $21 <$ *their* $x < 66$	e.g. $264 - 4x + 30 + 10x = 360$ $15 + 5x = 48 + 2x$, $165 - 5x = 132 - 2x$ *Their* equation must be linear and from at least 2 terms in x and at least 2 number terms. M1 implied by correct solution to *their* equation M1 M1 implied by $5x - 2x = 180 - 132 - 15$, $3x + 147 = 180$, $3x = 33$, $6x + 294 = 360$ May be implied by correct evaluation
